STORK, KYLE R

ART UNIT

PAPER NUMBER

2178

DATE MAILED: 03/07/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/883,500	Applicant(s) EVERHART ET AL.	
	Examiner Kyle R. Stork	Art Unit 2178	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This non-final office action is in response to the request for continued examination and the amendment filed 22 December 2005.
2. Claims 1-20 are pending. Claims 1, 6, 11, and 16 are independent claims.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 15 April 2005 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner is considering the information disclosure statement.

Claim Objections

4. Claims 1-20 are objected to because of the following informalities: Claims 1, 6, 11, and 16 recite limitations which may be performed. For example, the applicant claims that, "objects may be used more than once in a single report or may be used in more than one report and answers to the prompt object may be stored in association with the prompt object for later retrieval (claim 1, lines 10-12). These limitations are not positive limitations, in that the system is not required to perform such operations, merely that the system is capable of performing the limitation. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Yost et al. (US 6154766)

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

As per independent claim 1, Yost discloses a reporting system for creating a report wherein the report may specify one or more prompt objects as properties of the report comprising:

- An inner prompt object comprising a first question to be asked of a user and at least one validation property (Figure 3, item 116; column 10, lines 62-67: Here, the service to be monitored is the first question, which is validated by the user identifying one of the services from the object browser or service queue)

- An outer prompt object comprising a second question to be asked of a user and at least one validation property (Figure 3, item 118; column 11, lines 1-17: Here, the type of service is the second question, which is validated by the user selecting from either scheduled service or alert service.)
- Wherein the inner prompt object is nested within the outer prompt object (Figure 3), and wherein each of the inner and outer prompt objects is an object separate in object oriented programming terms from the report in which it is contained such that each of the inner and outer prompt objects may be used more than once in a single report or may be used in more than one report and answers to the prompt objects may be stored in association with the prompt object for later retrieval (claim 1: Here, the personalization information that is entered by a user to answer the prompts presented in Figure 3. This personalized information is then stored for the subscriber, wherein the personalized information can be routed to processing systems that apply the personalized information entered in the prompts to generate multiple outputs for a user. The prompts that are used to create the personalized information are analogous to the prompt object because these prompts objects are stored, separate from the report, and are passed to an output (report) generator in order to create the subscribed to output (report); column 11, line 1- column 12, line 35: Here, the objects that are accessed for selection of type of service, service duration, and schedule for service are objects in object oriented programming terms, in that the object is able to be accessed multiple times independent of the outer prompt object)

As per dependent claim 2, Yost discloses the system further comprising:

- A first answer provided by a user to the first question of the inner prompt object (column 10, lines 62-67)
- A second answer provided by a user to the second of the outer prompt object (column 11, lines 1-17)

As per dependent claim 3, Yost discloses the system wherein the first answer to the first question of the inner prompt serves as a validation property to the second answer to the second question of the outer prompt (column 12, lines 6-14: Here, the user has the choice of having the personal settings stored in order to update preferences at a later time. These stored properties would then become the default validation properties when a user subscribed to or cancelled existing services).

As per dependent claim 4, Yost discloses the system wherein the inner and outer prompt objects are embedded in a draft prompt (Figure 3: Here, the item 116 is the inner prompt while item 118 is the outer prompt. These items are further embedded in the draft prompt that contains prompts for selecting duration, schedule, content, and personalization).

As per dependent claim 5, Yost discloses the system wherein the inner prompt is used as part of a definition of a plurality of outer prompts (column 12, lines 6-14: Here, the answer to the inner prompt is used in the personalization of content for item 124).

As per independent claim 6, Yost discloses the method of creating a report to be executed on a reporting system comprising the steps of:

Art Unit: 2178

- Selecting a template with one or more template properties (column 6, lines 34-45)
- Selecting a filter with one or more filter properties (column 6, lines 34-45)
- Specifying one or more of the template or filter properties with an inner prompt object and an outer prompt object (column 6, lines 34-45; Figure 3)

The applicant further recites the limitations similar to those disclosed in claim 1. Claim 6 is similarly rejected under Yost.

As per dependent claim 7, the applicant discloses the limitations similar to those disclosed in claim 2. Claim 7 is similarly rejected under Yost.

As per dependent claim 8, the applicant discloses the limitations similar to those disclosed in claim 3. Claim 8 is similarly rejected under Yost.

As per dependent claim 9, the applicant discloses the limitations similar to those disclosed in claim 4. Claim 9 is similarly rejected under Yost.

As per dependent claim 10, the applicant discloses the limitations similar to those disclosed in claim 5. Claim 10 is similarly rejected under Yost.

As per independent claim 11, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 6. Claim 11 is similarly rejected under Yost.

As per dependent claim 12, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 7. Claim 12 is similarly rejected under Yost.

As per dependent claim 13, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 8. Claim 13 is similarly rejected under Yost.

As per dependent claim 14, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 9. Claim 14 is similarly rejected under Yost.

As per dependent claim 15, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 10. Claim 15 is similarly rejected under Yost.

As per independent claim 16, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 1. Claim 16 is similarly rejected under Yost.

As per dependent claim 17, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 2. Claim 17 is similarly rejected under Yost.

As per dependent claim 18, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 3. Claim 18 is similarly rejected under Yost.

As per dependent claim 19, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 4. Claim 19 is similarly rejected under Yost.

As per dependent claim 20, the applicant discloses the processor-readable medium comprising code for execution by a processor of the method of claim 5. Claim 20 is similarly rejected under Yost.

Response to Arguments

7. Applicant's arguments filed 22 December 2005 have been fully considered but they are not persuasive.

The applicants note that Yost is commonly owned with the present application is acknowledged. However, based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Further, the applicant argues that Yost fails to disclose the prompts as prompt objects in object oriented programming terms described in the specification (page 7). The examiner respectfully disagrees. Yost discloses use a set of prompts that require user input (Figure 3). Each of these prompts are objects, and are independent of the user's input to prior prompts (column 11, line 1- column 12, line 35). For example, the user selects a schedule for the service (Figure 3, item 122) after selecting the duration of the service (Figure 3, item 120). The prompt object for selection of a schedule for the service is independent of the selection for the duration of schedule (column 11, lines 18-

Art Unit: 2178

44). Similarly, the next prompt object, specification of the content of a service (Figure 3, item 123) is independent from the selected schedule (Figure 3, item 122; column 11, line 45- column 12, line 5).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kyle R. Stork whose telephone number is (571) 272-4130. The examiner can normally be reached on Monday-Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hong can be reached on (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
